## About the Conference

Translational Research in biomedical sciences is built on the strength of three major pillars: bench-side, bedside and community. It implements the "bench-to-bedside" approach, by seamlessly connecting laboratory leads, efficacy and safety related pre clinical and clinical trials, and point-of-care patient applications. The findings and experiences of the research teams in Chandigarh region will be shared with some of the outstanding global experts to catalyze new partnerships in their journey for harnessing knowledge from basic sciences to produce new drugs, devices, and treatment options for patients. International Conference on 'Translational Research in Life Sciences' will provide a platform to catalyze new multi-institutional collaborations in health sciences. The primary objective of the conference is to introduce participants to the ongoing efforts and opportunities in Translational Research. The conference will be an excellent opportunity for effective interactions and exchange of ideas between the researchers, scientists and industry partners.

## About the CRIKC

CRIKC- Chandigarh Region Innovation and Knowledge Cluster - endeavors to foster and sustain close academic alliances between institutions of higher education and research in the Chandigarh region, to facilitate innovation and knowledge creation and for achieving excellence in all academic spheres without compromising in any manner the autonomy of the participating institutions. More than 25 academic institutions in and around Chandigarh are the participating institutions of this cluster.

### Objectives of CRIKC:

- To identify and carry out joint and collaborative research projects and pooling of research facilities of the participating institutions.
- To promote the spirit and philosophy of 'Meta-University' concept.
- To promote and sustain excellence in research in biomedical sciences, applications of nano-science and technology and theoretical sciences.
- Nurturing scientific culture from school level and policy planning for better comprehension of Govt programs and societal needs.
